Granite stone

The surface of the granite stone is very simple, so it is not suitable to create very unique designs. But it has different colors like black, red, orange and ... which can be used beside each other to add more beauty to the place you want to cover.

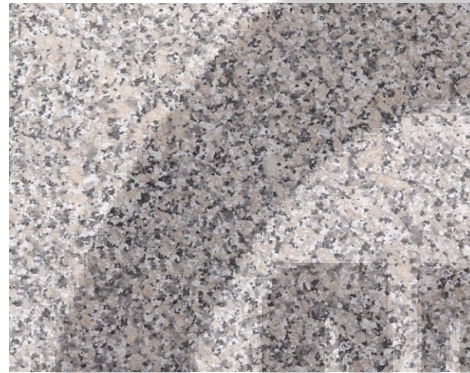

Granite stone is mostly cut in 40×40 and 60×60 sizes.

Slab Stone

Different kinds of Iran stones are cut and processed in factories. The quality is in accordance with world standards. The thickness is taken to be 2 cm so they are eligible to be used in foreign construction projects. The polishing process is done with best polishers and machines. Also in loading pallets, international packaging standards would be performed.
